**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Highest risk of sunburn across southwest and through the afternoon.

Forecast for Sunday 14 Aug 2022
Weather: The change is upon us with showers possible throughout, these probably turning heavy at times bringing the risk of hail, thunder and potentially flooding of smaller water courses where they linger. However given the showery nature of the flow some will escape with dry and occasionally bright conditions and temperatures will remain respectable for mid-August. Further low cloud ebbing and flowing from the coast.

Maximum wind: Variable 15mph or less

Chance of cloud-free hill tops above 800m: 90% at this level, but chance of cloud lower down in the north and east, also bases lowering sporadically in showers.

Low Cloud and visibility: Good or very good, becoming moderate or poor in showers, also very poor within cloud, in the north and east at lower levels, also occasionally in showers as bases lower 600m.

Temperature: **Glens:** Plus 9 Celsius increasing 23 Celsius for a time during the afternoon
At 800m: Plus 11 Celsius increasing 15 Celsius for a time during the afternoon
Freezing level: Well above all peaks
